Safety instructions

Important!

Carefully read the instructions before operating the unit.

This appliance is for indoor use only.

This unit must only be connected to a 220-240V~150Hz outlet.

Installation must be in accordance with regulations of the country where the unit is used.

If you are in any doubt about the suitability of your electrical supply, have it checked and, if necessary, modified by a qualified electrician.

This air purifier has been tested and is safe to use. However, as with any electrical appliance-use it with care.

Disconnect the air purifier from the socket when changing the filters or cleaning the unit.

Avoid touching any moving parts within the appliance.

Never insert fingers, pencils or any other objects through the guard.

This device is not intended for use by persons(including children)with reduced physical, sensory or mental capabilities. It is also not intended for use by those with a lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.

Do not leave children unsupervised with this device.

Do not clean the unit by spraying it or immersing it in water. Use a damp cloth only. Never allow water or vapours to enter the unit.

Do not clean with strong chemical agents or other abrasive materials.

Never connect the unit to an electrical outlet using an extension cord. If a power outlet is not available, one should be installed by a qualified electrician.

Never operate this appliance if the cord or power supply are damaged. Ensure the power cord is not stretched or exposed to sharp objects/edges.

A damaged power supply should be replaced by the manufacturer. Never extend or attempt to change the power supply lead.

Any service other than regular cleaning or filter replacement should be performed by an authorised service representative. Failure to comply could result in a voided warranty.

Do not use the appliance for any purpose other than its intended use.

Avoid removing the power cord from the socket whilst the unit is still in operation. This could cause electrical damage.

Never use the power supply as a switch to start and turn off the air purifier. Use the provided ON/OFF button located on the control panel.

Always place the unit on a dry and stable surface.

The use of accessory attachments that have not been approved by the appliance manufacturer is not recommended, as this may result in fire, cause an electric shock and/or cause personal injury.

Ensure hands are fully dried before plugging or unplugging the appliance.

The appliance should not be installed in laundry or wet rooms.

Always ensure the filters are fitted before turning on the appliance.

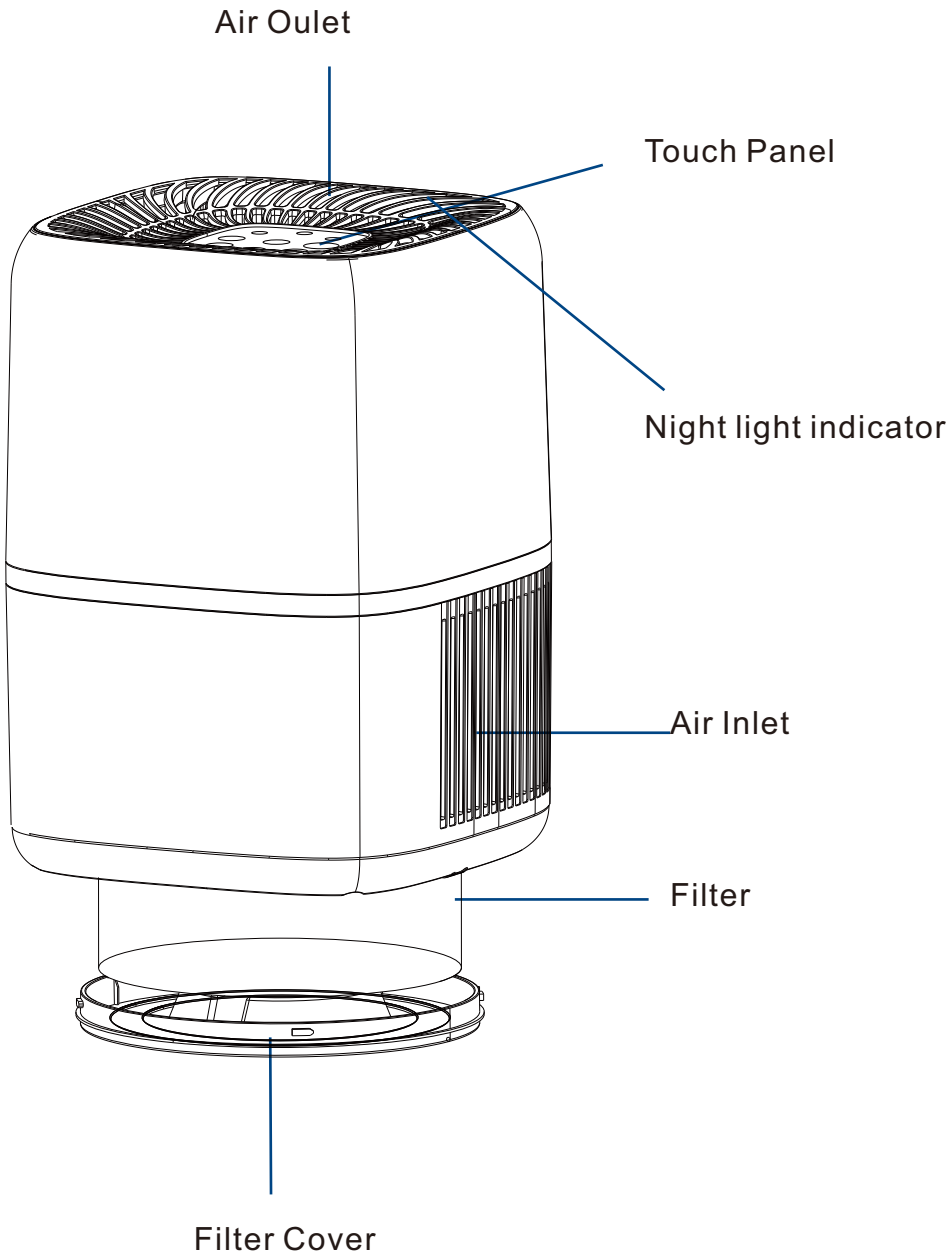

Energy Saving and Unit Safety Protection Tips

● Do not cover or restrict the airflow from the outlet or inlet grills.

● For maximum performance and safety the minimum distance from a wall or objects should be 20cm.Keep away from other electrical appliances.

● Keep the filters clean. Under normal conditions, filters should only need cleaning once every two weeks(approximately).Since the filters remove airborne particles, more frequent cleaning may be necessary, depending on the air quality.

Air purifier diagram

About your air purifier

The filter provides multiple stages of air purification using professional air filtration technologies. This unit features an advanced HEPA and activated carbon filters for improved air filtration.

- The Pre-filter is used for removing large particles like hair and dust
- Antibacterial HEPA filter to remove of airborne particles of 0.25 micrometres or larger.
- Activated carbon filter removes unpleasant odours and absorbs harmful substances such as form aldehydes and benzenes.

APPLICATIONS:

- Personal use in domestic and office space to improve air quality
- Helps smokers to reduce contaminants within the air
- Can help improve the symptoms of asthma and pollen allergies.
- Great for children's rooms and small offices

NOTE:

This air purifier is not a substitute for proper ventilation, regular vacuum cleaning or for use in place of a cooker hood whilst cooking. If the relative humidity is above 60%we recommend using a dehumidifier to reduce the humidity.

Information on indoor pollutants

VoC(Volatile Organic Compound):VOCs come from motor vehicle exhausts, gasoline vapour, pollutants such as formaldehyde, ammonia and many other common and chemical solvents such as paints and glues, or can be a by-product of mould growth. VOCs cause irritation to the eyes and or nose as well as causing headaches, nausea and even potential damage to the central nervous system. Pressed wood furniture, newly decorated rooms, paint and cleaning solvents are common sources of VOCs.

Mould /Fungus: These can affect our respiratory system and cause allergic reactions, like a runny nose, eye and throat irritation, headaches, fatigue and aggravation of asthma.

Other indoor pollutants include bacteria, viruses, dust mites and pollen.

Emissions from electronic office equipment: Many studies, including those from EPA and the University of California Berkley, have reported that emissions from office equipment such as computers and printers, include VOCs, ultra-fine particles and ozone. These emissions have been proven to have a negative effect on the health of many people which can be reduced by using an air purifier.

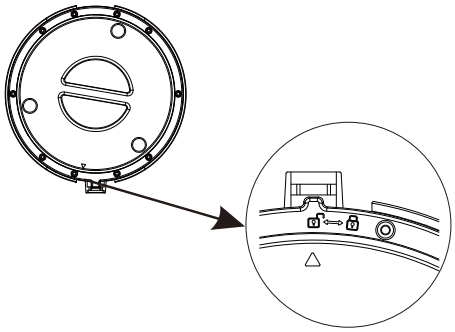

Using HEPA and Activated Carbon filters: An effective HEPA filter is absolutely necessary to remove particles, even at a microscopic level; it ensures that the particles are not spread.

The activated carbon filter will absorb unpleasant odours and reduce the VOC content in the air.

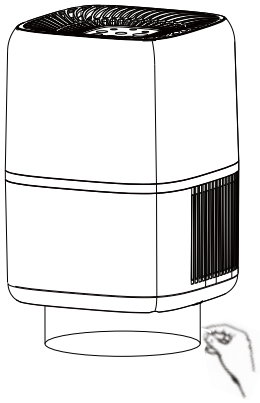

Operation instructions

Before first use

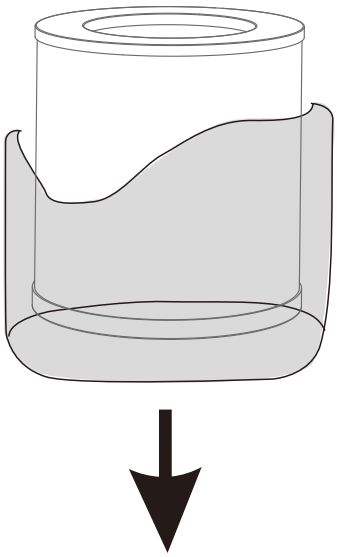

1) Unpack the appliance and remove the filter cover from the rear of the unit, by gently pulling the Air inlet panel back and then lifting off the unit.

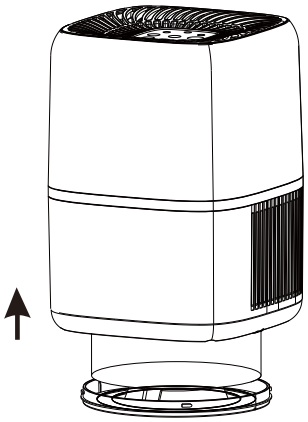

2) Remove the three filters from the rear of the unit. The pre filter should be gently freed from the slots holding it in position, then the HEPA and Carbon filter will slide out.

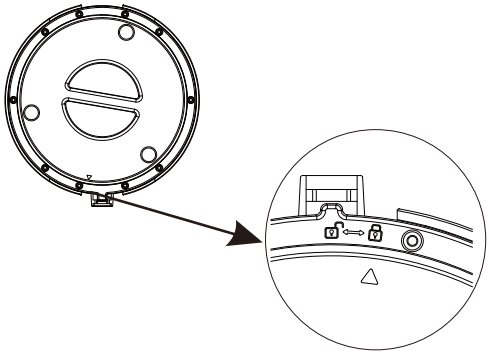

3)Remove the filters from the plastic protective packaging

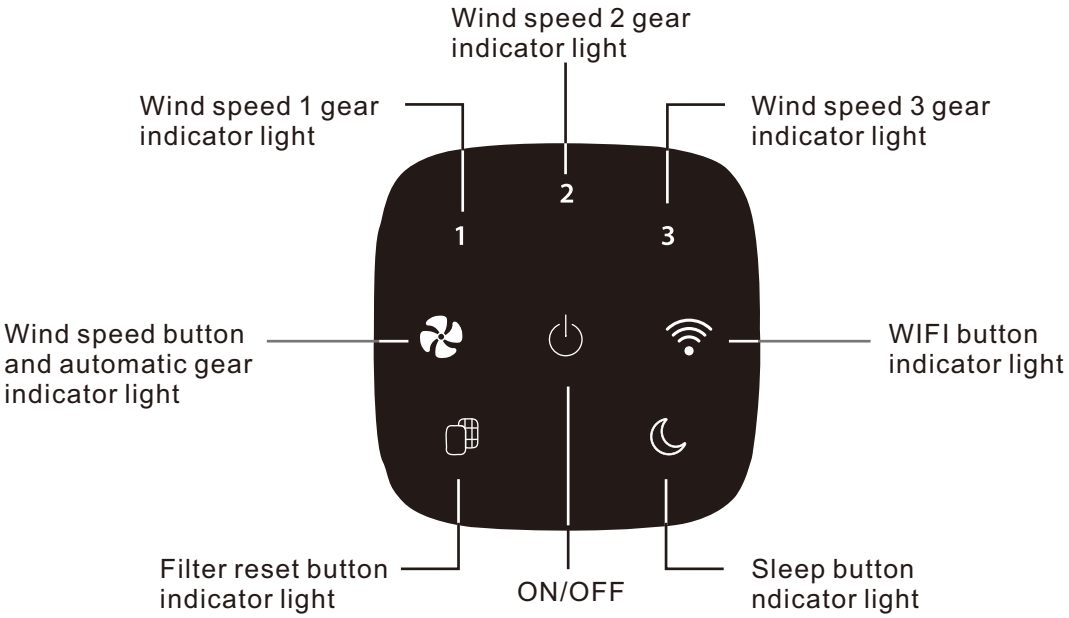

4) Load the filters into the rear of the unit ensuring the tags for removal are facing outwards. The pre-filter should be gently manipulated to ensure it is located into the slots in the unit.

5) Reinstall the air inlet panel by locating the base of the panel into the slots, and then pressing around the panel to clip it into place.

Control panel

ON/OFF

Plug in the power supply, all the indicator lights are lit for 3 seconds, at the same time, the three-color lights are lit in turn by red, green, and blue, and then all the indicator lights are turned off, the power indicator lights are half on, and the machine enters the standby state.

Sleep button

Press the sleep button, the indicator lights up, the other indicators are turned off, and the machine enters sleep mode. After the indicator lights on for 10 seconds, the light goes out. Press any key in sleep mode and the machine exits sleep mode.

Wind speed button

Press the wind speed button, a tone will sound, and the wind speed will be cyclically adjusted in 1st gear, 2nd gear, 3rd gear, and automatic gear.

Filter reset button

When the machine is working, it makes a rapid sound of 10 continuously, and the indicator light flashes to remind you that the filter needs to be replaced. After replacing the filter, press and hold the filter button for 3 seconds, the filter indicator light goes off, and the machine filter is reset successfully.

WIFI button

Press and hold the WIFI button for 3 seconds, the indicator light flashes, and the WIFI module is turned on.Use the mobile phone with the supporting APP software to configure the wifi. When the wifi configuration is successful, the wifi indicator light on the machine stops flashing and remains on.

Care and maintenance

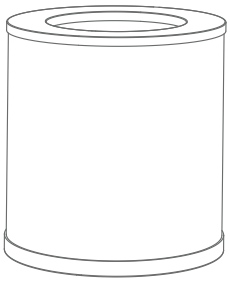

● Always shut off the unit and unplug from the mains before cleaning or performing any maintenance.

● When the unit is not in use for long periods, it is advisable to remove the plug from the power socket.

● Do not use chemical solvents(such as benzene, alcohd or gasoline)as they may cause irreversible damage to the unit.

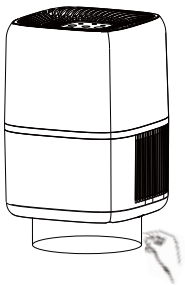

Cleaning the filter and filter holding area

The filter should be cleaned every 2-3 weeks to remove any debris which has accumulated on it, while cleaning the filter, the filter holding area should also be wiped with a dry cloth. I fused in dustier environments the filter may require more regular cleaning. For a deeper clean the filter can be removed and rinsed in clean water and then left to dry naturally. Ensure the filter is fully dry before reinserting into the unit. The filter must be replaced if there are any signs of damage.

Changing the filters

Remove and replace the filters following the instructions found on Page 8. Once the filters have been replaced, press and hold the RESET button for 5 seconds to reset the filter counter.

Cleaning the case

● Only use tepid water and a mild detergent on a soft cloth.

● Do not use bleach or abrasives.

● Do not splash water directly onto the main unit.

● Avoid wetting the power connection port, doing so may cause an electric shock and can lead to the insulation deteriorating or unit to rust.

Cleaning the filter cover and clean air outlet

● Use water and a mild detergent.

● Do not use bleach or abrasives.

● Do not spray water inside the unit.

● If the clean air outlet grilles get soiled easily, use a vacuum attachment or soft brush to clean.

● If the filter cover is dirty, hoover it. If it is heavily soiled, wash it with warm soapy water and dry thoroughly before reinserting it in the unit.

Note: Do no assemble the unit and power it on before all the parts are completely dry. Any other maintenance than what is described in this user manual must be only performed by the service centre.

Troubleshooting

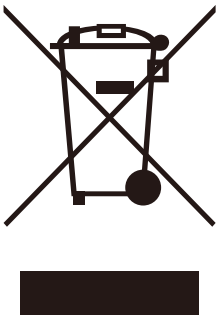

Issue	Check
Not working	Check that the unit is plugged in Ensure that the filters and filter cover are correctly installed.
Abnormal Smells	Check if the filters are clean.Replace the filters.
Pollutants not removed and loud noise when running	Check if the filters are clean.Replace the filters.
Reset indicator flashing	Replace the filters and reset the appliance following the care and maintenance section.

Our Sales and Customer Care advisors are committed to offering the highest level of care. We are proud in our products and love help our customers! Please do not return a product without first getting in contact with us. We are here to assist you all the way.

Please also see answers to our frequently asked questions.

If your enquiry relates to an existing order, please give us your order number so we can assist you as quickly as possible.

Do not dispose this product as unsorted waste. Collection of such waste must be handled separately as special treatment is necessary.

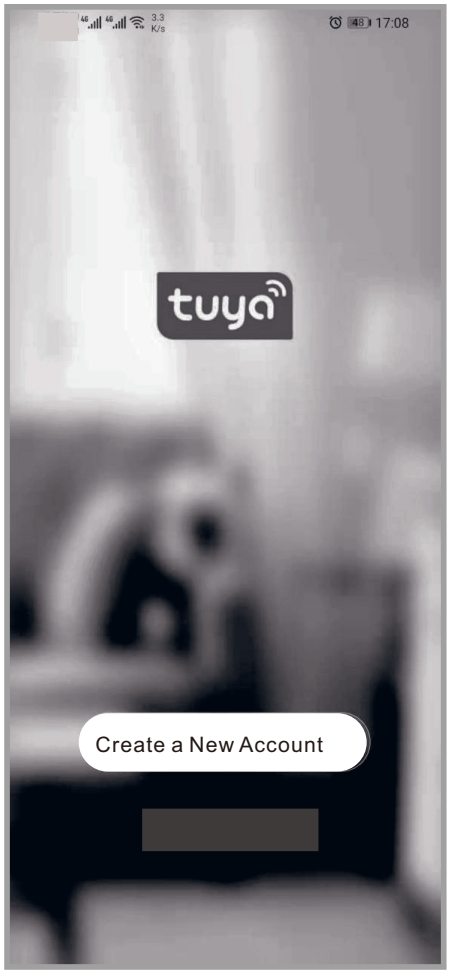

Recycling facilities are now available for all customers at which you can deposit your old electrical products. Customers will be able to take any old electrical equipment to participating sites run by their local councils. Please remember that this equipment will be further handled during the recycling process, so please be considerate when depositing your equipment. Please contact the local council for details of your local household waste recycling centres.

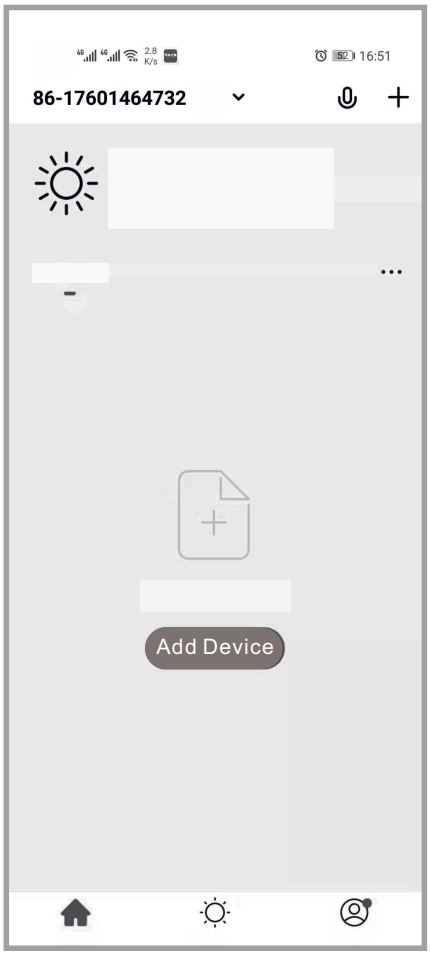

Tuya Smart App Connection Guide

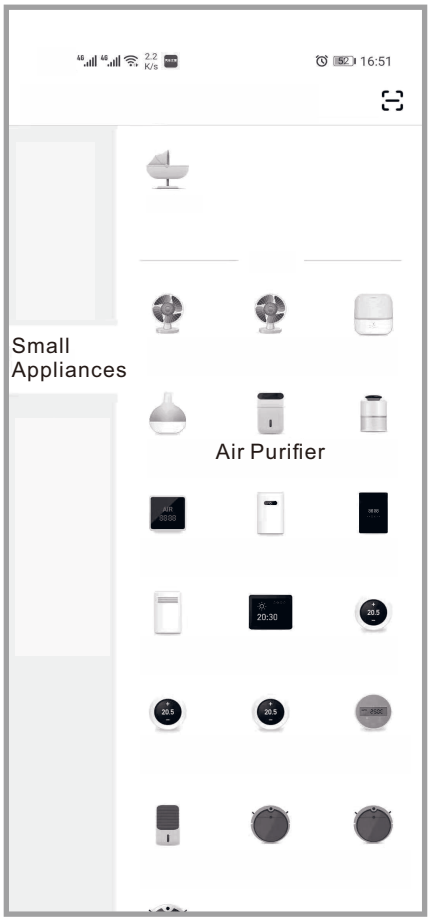

1. Scan the QR code shown in the image above to download and install the Tuya Smart app;

2. Open the Tuya Smart app and choose to create a new account or log in directly;

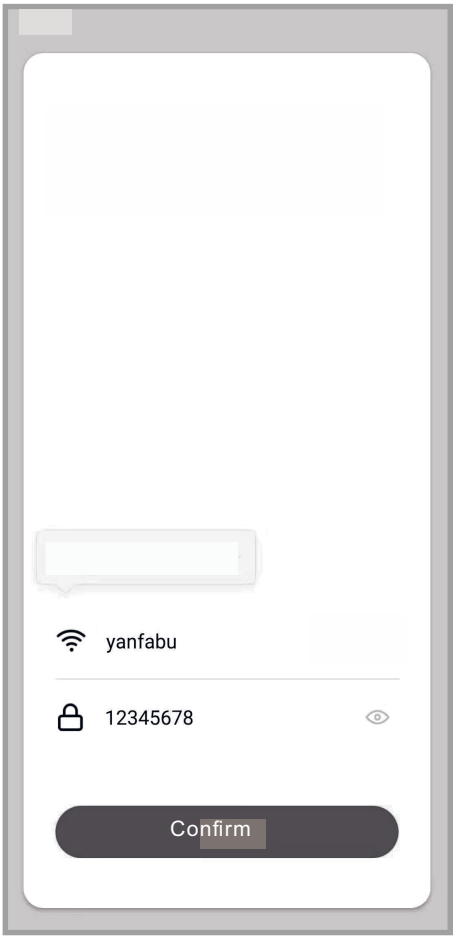

3. Tap the “+” icon in the upper-right corner to add a device;

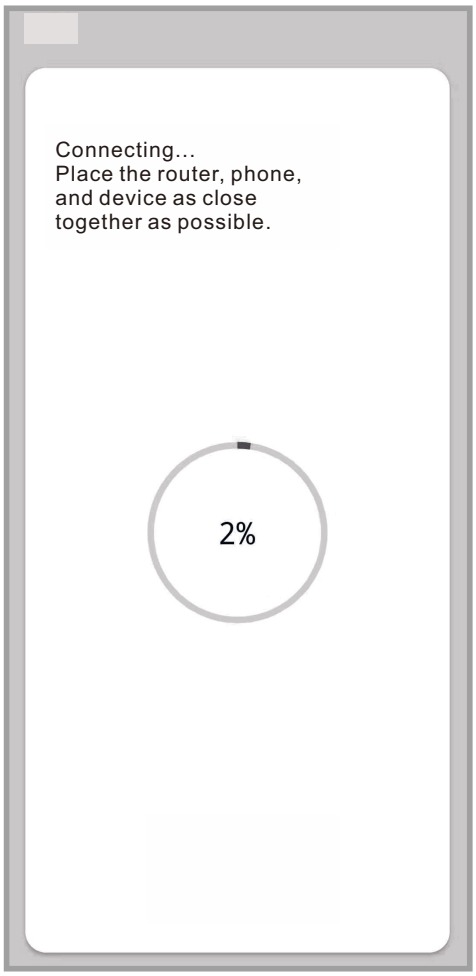

4. Select “Small Appliances—Air Purifier”—5. Turn on the air purifier, press and hold the timer button for 3 seconds, and release the button after you hear a beep; at this point, the WIF1 indicator light will flash;

5. Tap “Confirm” when the indicator light is flashing;
Note: Please make sure your phone and air purifier are connected to the same Wi-Fi network;

6. Enter the Wi-Fi password and click “Confirm”;

7. Wait for the device to finish connecting;

8. The message “Device added successfully” indicates that the device has been successfully connected;

9. Click “Done” to enter the control interface and operate the machine;
